

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1           **Claim 1 (currently amended):** Adjustable handle  
2           comprising an operating lever (2) ending into a cylindrical  
3           or prismatic body (3) inside which there is slidably  
4           mounted a tightening member (4) carrying a bushing or a  
5           stud (5), the cylindrical or prismatic body (3) and the  
6           tightening member (4) comprising fellow toothings (6) kept  
7           in reciprocal engagement by a spring (7), and a check  
8           element (8) onto which is imparted a pressure to overcome  
9           the action of the spring (7) and remove the engagement  
10          between said toothings (6), wherein said check element (8)  
11          is a control push button (8) projecting from said body (3),  
12          said push button being fixed against rotation in both  
13          directions relative to the tightening member (4), said push  
14          button (8) incorporating a seat (9) accessible from its  
15          operating surface (10) for engagement by a mounting/removal  
16          tool.

1           **Claim 2 (previously presented):** Adjustable handle as  
2           in claim 1, wherein said seat (9) is molded into said check  
3           element (8).

1           **Claim 3 (previously presented):** Adjustable handle as  
2       in claim 1, wherein said operating surface (10) of the  
3       control push button (8) is formed onto a cap (11) which is  
4       applied onto said check element (8) so as to form an  
5       integrating part thereof, said spring (7) abutting against  
6       the periphery of said cap (11) inside the body (3) of the  
7       handle (1).

1           **Claim 4 (previously presented):** Adjustable handle as  
2       in claim 3, wherein said cap (11) comprises a through hole  
3       (11B) at the center of its operating surface (10) and is  
4       applied by snapping onto said check element (8).

1           **Claim 5 (previously presented):** Adjustable handle as  
2       in claim 1, wherein said seat (9) has an hexagonal section.

1           **Claim 6 (previously presented):** Adjustable handle as  
2       in claim 1, wherein said seat (9) is a cross-cut.

1           **Claim 7 (previously presented):** Adjustable handle as  
2       in claim 1, wherein said seat (9) is a screwdriver cutting.

**Claim 8 (canceled)**

1           **Claim 9 (previously presented):** Adjustable handle as

2       in claim 1, wherein said tool is an Allen wrench of a  
3       motorized screwer/unscrewer.

1               **Claim 10 (previously presented):** Adjustable handle as  
2       in claim 1, wherein said tool is a screwdriver of a  
3       motorized screwer/unscrewer.

1               **Claim 11 (previously presented):** Adjustable handle as  
2       in claim 1, wherein said operating lever (2) has an  
3       ergonomic structure.

1               **Claim 12 (previously presented):** Adjustable handle as  
2       in claim 11, wherein said operating lever (2) is slightly  
3       curved and tapered towards an outer end.

1               **Claim 13 (previously presented):** Adjustable handle as  
2       in claim 1, wherein said mounting/removal tool is  
3       motorized.
